### **Notes from the Field**

## Signing of South Australian Common Incident Management Framework – Control Agency Agreement

On 20 February 2014 a Common Incident Management Framework Control Agency Agreement was signed by all South Australian Control Agency Chief Executive Officers. South Australia emergency management arrangements determine a Control Agency for all emergencies regardless of level and require all other agencies to support that control agency in meeting 10 defined objectives for resolving an incident. There are nine different agencies allocated the control role across the emergency spectrum in South Australia. Some of these agencies use the AIIMS model, Police use the ICCS+ model, and there are a number of other derivatives in use.

This is a first across Australia and means control agencies in South Australia will work under a common framework, with consistent terminology and standards at local, regional and state levels. In addition, the framework commits the control agencies to:

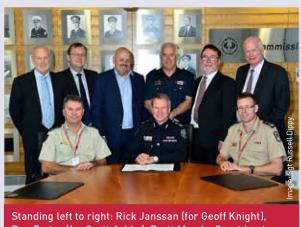

- · apply functional management
- align management with the 10 responsibilities of a control agency
- provide for a common diagrammatic representation of the management structures, and
- nominate that the person leading the control agency in the response is to be known as the Incident Controller.

This last point will reduce a large amount of confusion that arises with multiple persons wearing similar tabards. The new South Australian framework does not detract from the AIIMS or ICCS+ models but builds them into a common framework to ensure interoperability.

This new framework builds on the April 2011 agreement signed by the Country Fire Service (CFS), Metropolitan Fire Service, State Emergency Service and Police which at the time was also a first across the nation. The 2011 agreement has been successful and, in fact, received recent praise at the last South Australian State Emergency Management Committee by the CFS Chief Officer (Mr Greg Nettleton) who asserted that one of the reasons for the successful management of the January fires, heat and flood events was in part due to the seamless integration between the emergency services, due to the common incident command systems in use between emergency services and police in the state. The commonality of this system with national systems also allowed seamless integration of the fire-fighting resources from New South Wales, Western Australian and Victoria. Given that praise, it can be reasonably assumed that the new agreement will have similar benefits for the community.

The State Coordinator, Police Commissioner Gary Burns congratulated all signatories for their unity and commitment noting that such cooperation between the agencies significantly contributes to ensuring that the South Australian community receives the best possible response from all agencies in time of an emergency.

For further information on this agreement please contact SAPOL's Emergency Management Coordinator, Senior Sergeant Russell Dippy at russell.dippy@police.sa.gov.au or 08 732 24251.

Standing left to right: Rick Janssan (for Geoff Knight), Don Frater (for Scott Ashby), Brett Morris, Grant Lupton, Stephen Christley (for David Swan), Rod Hook. Seated left to right: Greg Nettleton, Gary Burns, Chris Beattie.

# CALL FOR PAPERS AND PEER REVIEWERS

The Australian Journal of Emergency Management is an official publication of the Attorney-General's Department. Its purpose is to be a world-class journal advancing emergency management knowledge, research and practice.

In 2015 the AJEM will publish a special edition focussed on animals and pets – both as at-risk factors for evacuation and their role in recovery.

Practitioners, professionals and academics are encouraged to submit manuscripts for publication consideration. Authors should refer to and comply with the AJEM Editorial Guidelines and the Contributor Guidelines available on the AJEM website. Papers will be evaluated on the basis of originality, content, clarity, and relevance to the theme.

Practitioners, professionals and academics with particular experience, knowledge and skills in this area are invited to nominate as a referee of papers.

All correspondence can be directed to ajem@ag.gov.au.

#### **TYPES OF SUBMISSION**

Research articles: present an original thesis and report results that are based on an empirical method of evaluation. Subject to double blind peer review. Word limit guide (total with references): 3000 words.

Practitioner papers: present information, innovation, practice stories, lessons learned, evaluation and onthe-ground methodologies in a practical sense. Subject to single peer review. Word limit guide (total with references): 3000 words.

Opinion: pieces that reflect the submitting author's evaluation of and commentary on the topic that is of interest to students and practitioners of emergency management. Approval to publish opinion pieces rests with the Editor-in-Chief. Not peer reviewed. Word limit guide: 1000-1500 words.

Book/media review: reviews a recent publication on the topic. Reviews must provide critical evaluation of content. Not peer reviewed. Word limit guide: 700-800 words.

Case study/reports: present a short explanation and evaluation and possible recommendations about a particular topic relevant to the theme. They could include lessons learned, innovative practices, and new developments. May be subject to single peer review.

Word limit guide: 700-800 words.

### **DEADLINES**

Abstracts for editorial consideration are required by 20 February 2015.

Other submissions are required as soon as possible.
