

### Footy tipping fever

Competition was tight after the final round of the LSNT's AFL footy tipping competition.

To build suspense, the final results were not released for a couple of days - but the suspense was too much for some people. Muster Room has learnt that one culprit rang some of the other leaders to find out how many winners they had picked so that they could work out the final placings.

### Reeves' golf day from heaven

Muster Room recently received a very impressive golf score card.

On 27 August, Barbara Reeves managed an impressive nett

score of 59 (Gross 88, Handicap 29).

Congratulations! Let's hope you can do it again next week.

### A fine trip overseas

By all reports, Peter Barr's recent trip to New Zealand got off to a fine start.

After a parking infringement at the airport before leaving, Peter was pulled up at immigration in New Zealand and fined for trying to smuggle in a miscellaneous mandarine which was located in his luggage.

Some people try to smuggle arms or drugs, but the lucrative mandarine market has previously escaped the attention of Muster Room.

## The Muster Room

If you've got a more impressive golf score than Barbara Reeves or any other gossip for Muster Room, please send it to [publicrelations@lawsocnt.asn.au](mailto:publicrelations@lawsocnt.asn.au)

**J.W. Munday and Associates (Australasia)**  
Forensic Fire and Explosion Investigation

PO Box 251 Avoca Beach NSW 2251

Tel/fax: (02) 4365 0556

We offer a full range of forensic science services in the investigation of fires and explosions including

- direct incident investigation (origin & cause, liability, recovery etc.)
- laboratory analysis and interpretation of results
- assessment and commentary on previous investigation findings
- expert testimony and advice to counsel (criminal and civil litigation)

We have particular expertise in

- incidents involving fatalities
- interpretation of thermal injury distribution
- gas and vapour explosions
- electrical systems and causes of fire
- interpretation of documentary and photographic evidence
- laboratory testing of fire-related evidence

Jim Munday has specialised in fire and explosion investigation since 1979, with Scotland Yard's forensic laboratory and in private practice in the UK & Australia. He has investigated more than 1700 fire and explosion incident scenes, including over 300 fatalities, and carried out laboratory testing on materials from many others. He has given expert evidence in many courts.

Trained as a forensic chemist, Jim is also a qualified fire engineer and one of the few holders of the prestigious Diploma in Fire Investigation awarded by the UK Forensic Science Society. He has made a special study of the way in which distribution of skin burns and other thermal injuries relates to the location, position and activities of the person involved.

Our Senior International Associates include Dr John DeHaan (USA) and Mr Michael Gardiner (UK).
